

New animals models to Understand the brain - 2nd edition

15 mai 2017 - 8h45 - 17h00

INRA Centre Val de Loire

Salle de conférences

Coffee break
Introduction of the meeting

● Session 1 – Diffusion MRI

- > Diffusion MRI; *Tim Dyrby*
- > Impact of early rearing experience on brain development in sheep infant; *Elodie Chaillou*
- > Sheep brain connectivity; *Cyril Poupon*

Coffee break

● Session 2 – Technical developments

- > Use of MPIOs as a contrast agent in sheep; *Lucille Butruille*
- > Adenoassociated virus vector for brain manipulations; *Dora Zelena*
- > Segmentation of sheep brain images using local probabilistic atlases coupled with topological information; *Gaëtan Galisot*
- > Virtual slides for big brain: Services and system by *Excilone; Bertrand Damart*
- > Stereotactic neurosurgery based on 3D imagery (*m2e, Inomed, Inra, Inserm*); *Christophe Destrieux*

Lunch

● Session 3 – Model of neurobiological troubles

- > Sheep, a model for Batten disease; *Jenny Morton*
- > Sheep, a model for neurovascular pathology; *Bjorn Nitzsche*

● Session 4 – Brain anatomy

- > The Göttingen minipig telencephalon; *Carsten Bjarkam*
- > Atlas of the sheep cortex; *Scott Love*

Conclusions

Registration is free but required

(Deadline: May 3rd, 2017; lunch included)

Limited number of participants (110)

Comité d'organisation

Elodie Chaillou
Martine Migaud
Yves Tillet
Frédéric Andersson
